PRINCE SAINI

Full Stack Developer (MERN)

9389825898 | Explore my work | Github | Linkedin | codewithprince0@gmail.com | Delhi

Full Stack Web Developer with 1.5+ years of experience delivering high-performance web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proven expertise in frontend optimization, backend API development, authentication, and database design. Adept at building scalable, secure, and user-centric solutions. Passionate about continuous learning, open-source contributions, and creating impactful software.

EDUCATION

Bachelor of Computer Applications (BCA)
Quantum University, Roorkee (UK)

CGPA: 7.4 | Sep 2021 - Aug 2024

TECHNICAL SKILLS

Programming Languages: JavaScript, Typescript, C, C++ **Frontend:** React.is, Next.is, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js

Database: MySQL, MongoDB, Firebase **Software:** Git, GitHub, VS Code, Postman

Core Skills: REST APIs, Authentication, Data Structures & Algorithms (DSA), MVC Architecture

EXPERIENCE

Full Stack Developer | Haxways | Nov 2023 - Present

- Developed and optimized frontend and backend of a client websites using the MongoDB, Express.js,
 React.js, Node.js, ensuring high responsiveness and a seamless user experience.
- Collaborated with the design team to implement visually engaging, interactive, intuitive interfaces aligned with UI/UX best practices.
- Improved **Frontend performance**, **responsiveness**, and cross-browser compatibility for enhanced adaptability across devices

Web Development Intern | Techonical Infotech | July 2023 – August 2023

- Led the development of a dynamic and responsive website for *Health Care Dr. Tanveer Fatima, Roorkee*, ensuring a seamless user experience aligned with brand values.
- Implemented responsive design principles, multi-device compatibility, fast load times, and smooth navigation for optimal usability.

PROJECTS

INCENTUM | Visit Project | Feb 2025 - April 2025

- Developed a live, responsive loan application website incentum.loans enabling users to apply for loans, upload
 documents securely, and receive approvals efficiently.
- Designed and implemented a fully responsive UI using React.js, Redux and Tailwind CSS, ensuring full device compatibility and a seamless browsing experience.
- Integrated **secure authentication** to enhance user experience.
- Built a dynamic dashboard for users and admin to track loan status and manage documents.
- Developed backend RESTful APIs using Node.js and MongoDB to handle user data and loan applications.

AI TRIP GENERATOR | Visit Project | Aug 2024 - Oct 2024

- Created an "AI-based trip planning application" that dynamically generates personalized travel itineraries based on user input such as destination, trip duration, budget, and group size.
- Integrated Google OAuth, Places API, and Firebase to enable secure user authentication, dynamic data retrieval, and real-time trip storage.
- Leveraged **OpenAl's GPT-based Gemini Al** to deliver personalized travel recommendations, optimize itineraries, and enhance user experience.
- Developed a user-friendly, interactive frontend and seamless backend functionality using the MERN stack.

ACHIEVEMENTS

- Full Stack Development, Haxways
 - Web Development Internship, **Techonical Infotech**
- Robotic Process Automation (RPA), Honeywell Empowerment Program
